## **SUMMARY**

I am an ambitious data scientist in training, currently pursuing my bachelor's degree in Computer Science at Vellore Institute of Technology. I am deeply engaged in web development and actively working on data science projects, driven by a passion to delve into data science and uncover insightful findings. I possess excellent team-building and management skills, with a proven track record of success.

#### **EXPERIENCE**

Collab Junction Remote

Data Analyst Intern

June 2024 - Present

- Conducted in-depth analyses of geographic data to understand university students' mindsets and event interests, creating detailed reports and visualizations to communicate actionable insights and drive strategic decisions.
- Collaborated with the operations team and experienced professionals to identify and resolve operational challenges through data-driven solutions, continuously enhancing analytical skills through ongoing learning opportunities

#### **EDUCATION**

## **Vellore Institute of Technology**

Vellore, TN

Bachelor of Science in Computer Science

July 2023 - July 2027

Highest GPA: 9.49/10.00

## Sri Narayani Vidyashram(CBSE)

Bachelor of Science in Computer Science

Percentage: 83.6%

Vellore, TN March 2022 – March 2023

#### **SKILLS**

• **Programming**: Python, C, C++

Data Science : Data Analysis, Machine Learning, NumPy, Pandas, Matplotlib, Scikit-Learn,

Development : HTML, CSS, JavaScript

Operating Systems: Windows, Linux

Database : Oracle, MySQL, SQLite

• Software: MS Office, GitHub, Power BI, Figma

• Others: Problem Solving, Critical Thinking, Communication, Leadership

#### **PROJECTS**

### Adidas Sales EDA | Link

Exploratory Data Analysis

- Conducted a comprehensive Exploratory Data Analyss (EDA) of Adidas Sales data, focusing on data cleaning, preprocessing, statistical calculations, and visualizations to identify sales patterns across time and regions.
- Segmented customers based on purchasing behavior and demographic data, providing valuable insights into target audiences and enhancing understanding of customer preferences.

#### Titanic Survival Prediction | Link

Machine Learning

- Utilized the publicly available Titanic dataset and conducted thorough data preprocessing, including handling missing values and transforming categorical features, to prepare for predictive analysis.
- Developed and evaluated multiple machine learning models Logistic Regression, Decision Tree, Random Forest and Support Vector Machine (SVM) to predict passenger survival, achieving the highest accuracy of 84.92% with the Random Forest model.

#### **HONORS & INVOLVEMENT**

- Secured 3<sup>rd</sup> place in python Code-a-thon conducted by Capsule Labs during my first semester
- Received Merit Scholarship from VIT for Academic excellence
- Received Cent Percent Attendance Scholarship from VIT for maintaining consistency
- Presented an IEEE conference paper during my first year
